Event image

need Google font global options for emails with fallback for outlook.

Email background and content area background colour options

So you're going to the {event_title}, see you there.

Email heading (new custom field needed per event as well as email subject field.)

Hi {attendee_name},

Thanks for booking {event_title}. Your booking reference is {order_ref}.

Email content 1

Event date:
{event_date}

Event time:
{event_time}

Event type:
{event_type}

All these need to be pulled in from the event data

Event location:
{event_location}

Virtual Event link

If it is a virtual or hydrid evcent we need a custom field to add a zoom, teams or any other video conferencing platform and only then does this button appear. Please give me style controls for this button (text & background colour border radius etc)

If you have any questions, reply to this email.

{organiser_name}

Email content 2

Email footer text, please provide a custom field for the admin to add this content. Globally, as well as can be overwrtten at event level too

Email footer text
